Z⁰² D-Drive™ Direct Drive Safe Lock

Z⁰² D-DRIVE LOCK BODY

D-DRIVE KEYPAD
FOR USE ONLY WITH D-DRIVE LOCKS

- Underwriters Laboratories Listed Type 1, and RoHS (Reduction of Hazardous Substances) compliant.
- The Z⁰² D-Drive lock features a counterbalanced solenoid locking mechanism for a high level of security and extended battery life.
- The D-Drive keypad features a sure-grip, low profile design, with external battery placement for easy changing.
- Manual bolt operation—bolt retraction and extension is accomplished by turning the outer ring of the keypad after a valid code is entered.
- No-twist cable design virtually eliminates cable damage due to keypad rotation. Cable is fully protected inside a special spindle channel.
- Drilled and tapped lock bolt (for M4-.7 machine screws spaced 15 mm center to center) is designed to push and pull 2.5 lbs. (11.12 Newtons) continuous and 10 lbs. (44.48 Newtons) maximum.
- Management reset code, one master code, one supervisor code, five user codes, and one time delay override code.
- Management reset code (MRC) restores the lock to its original factory code if the master code is lost.
- Time delay up to ninety-nine minutes, and three modes of operation (single control, dual control, and manager/employee mode).
- The Z⁰² D-Drive lock incorporates a penalty time feature to prevent opening by entering sequential or random codes until a valid code is found.
- All programming is quickly and easily done via the keypad (no separate programming equipment required).
- The lock bolt model withstands 225 lbs. (1000 newtons) of bolt end pressure for superior security in boltwork blocking applications.
- Non-handed construction allows mounting right-hand, left-hand, vertical-up, or vertical-down.
- Easily add a bolt position indicator module to trigger any relay-activated device during lock opening.

Lock Bodies with Keypads and Accessories

| Part Number | Description |
|-------------|---|
| 2004-200 | Z ⁰² D-Drive lock with rotating keypad and spindle |
| 2004-100 | Z ⁰² D-Drive lock body only |
| 6130-200 | D-Drive rotating keypad only |
| 2004-600 | bolt position indicator module |
| 2004-700 | wing kit |

Add a bolt position indicator module to any Z⁰² D-Drive lock in a minute or less.

BOLT POSITION INDICATOR
Part #2004-600

Add "wings" to any Z⁰² D-Drive lock for two additional boltwork attachment points. It only takes a screwdriver and a minute of your time.

WING KIT
Part #2004-700
